

FLAG Site Needs:

From Jim:

- **About Us sections:** I've written some bare-bones stuff just to try and have something present. Those currently consist of:
<https://robtisdell.github.io/robtisdell.git.io/about.html>
<https://robtisdell.github.io/robtisdell.git.io/history.html>
- **Contest sections:** I rearranged the rules a bit and split them into "Contest rules" and "Winner Expectations" categories. I want to be sure this was fine:
https://robtisdell.github.io/robtisdell.git.io/contest_rules.html
- **Affiliates section:** I need a list of who we want to include there and how we want to categorize who we include there (IE "Clubs", "Charities", "Vendors"). Ideally approval is given from those groups, as I'd like to include their logos.
- **Staff section:** I need photos of any older staff members, their positions, what titles they held, and any pictures that go with them. Also any sort of small blurb for each of them would be appreciated. Relevant link:
<https://robtisdell.github.io/robtisdell.git.io/formerstaff.html>
- **Previous titleholders:** I already have the older titleholders up on a page with their pictures and years held, but there is free space on the page for each to have a small blurb about them, so if you have any ideas what can be put there for them, that would be awesome.
<https://robtisdell.github.io/robtisdell.git.io/formerstaff.html>

From Rocco:

- I need a copy of the bylaws and any other relevant files I don't have (I currently have contest rules, contest application, FLAG membership application)

From all titled board members:

- I would like a picture of each of you, what position(s) you're holding, and from what year you started holding them (*I apologize but I'm terrible with remembering who has which titles :x*). Any small blurb you want to add about yourself would be awesome.
<https://robtisdell.github.io/robtisdell.git.io/staff.html>

From everyone:

- It would be awesome if I got everyone to do a once-over both on mobile and desktop. If you could write down any thoughts, I'd love to use the next meeting to discuss the site. Ideally we can get this live this summer.

Stuff not done yet I am aware needs to be implemented:

- Pictures. I need to work out how to integrate Instagram feeds in, but that's a whole thing and I want to get feedback and content up.
- 21 years of age warning. This will be *the very last thing* I implement before the site goes live. To properly test the site, I need to reset settings whenever I make a change, which would mean resetting whatever token I use to flag that I'm over 21 and that would just be an infuriating popup to deal with when I just want to make sure layout is correct.
